| • AR     | • Git     | • SQL      |
| • VR     |           | • Firebase |

---

### PROFESSIONAL CAREER

---

#### LIGA Facens

*Tech Lead / Unity Developer*

Sorocaba-SP, Brazil

May 2018-present

During my time at LIGA, I worked on various types of solutions using the Unity engine as virtual reality trainings for companies such as ZF (ZF Friedrichshafen AG), ABB (ABBN: SIX Swiss Ex), Case IH, DPR, among others. I also worked on mobile games (Android & iOS) most of them for the brazilian television company SBT. As in LIGA, the demand for projects is very high, I gained a lot of experience in developing projects quickly, but always trying to maintain quality, focusing on maintaining a good performance on the hardware on which the applications run and learning new concepts and technologies that facilitate the development process. As Unity Tech Lead, I am responsible not only for the development process, but also for instructing and helping less experienced developers, clearing their doubts, performing code reviews and holding meetings to bring new technologies and solutions made with Unity.

---
